

# Removing the complexity from availability

## Stratus at a Glance

Industrial technologies are becoming more powerful and more complex - able to generate massive amounts of data to improve processes. Yet these technologies are often deployed where there are limited or no IT resources. Whether they reside at the data center or the plant floor, industrial applications require operational simplicity and continuous availability for real-time data capture, analytics and insight.

Companies cannot afford for their industrial applications to be too complicated to manage or suffer any downtime.

Stratus offers a simple, fail proof and cost-effective way to deploy and maintain a continuously available processing environment for virtualized applications – both in the data center and at the edge. By simplifying industrial computing, we make it easy to protect workloads, manage systems, and generate insights from operational data.

All of Stratus' solutions can be rapidly deployed without any changes to your applications. Our software and servers – combined with our people – enable us to identify problems that others miss and prevent downtime before it occurs.

## If simplicity and availability are requirements

## STRATUS TECHNOLOGIES HAS A SOLUTION THAT FITS

### WHICH OPERATIONS PLATFORM DO YOU CHOOSE?

Stratus provides operationally simple, long lasting and continuously available data and application infrastructure.

VS.

#### SAN-Based Clustered Environments:

- Expensive, highly complex and difficult to maintain
- May not be suitable for management by typical plant personnel and require specialized IT resources
- Don't offer complete availability and outage protection

✓ Operationally simple

✓ Continuous availability

✓ Cost effective

Our all-inclusive, simple-to-implement, end-to-end solutions provide worry free operations with integrated hardware, software and service.

Our software solution allows you to build Stratus availability into your infrastructure using your choice of x86 servers.

**SMBs and Global Fortune 500 companies alike rely on Stratus to keep them up and running, without the complexity.** Our products are easy to deploy and manage, allowing your applications to run without specialized expertise.

**OUR SOLUTIONS SUPPORT A VARIETY OF OPERATING SYSTEMS AND ARE DESIGNED TO RUN IN PHYSICAL, VIRTUALIZED OR CLOUD ENVIRONMENTS.**

**Datacenter**

**Edge**

**IIoT**

**Cloud**

With over 35 years of experience, **Stratus Technologies** understands this challenge and **is dedicated to removing the complexity from keeping business critical applications running 24/7/365.**

## In Partnership with Industry Leaders

Customers expect us to bring always-on performance to the operating environments and products they use most often. We can offer sophisticated, high-performance solutions that integrate seamlessly into any IT infrastructure because of our strategic alliances with other open-systems technology leaders.

These mutually beneficial partnerships deliver customer value that's impossible to achieve with either party working alone, beginning with initial installation, and continuing throughout the application lifecycle.

### 97% of Customers

Satisfaction ratings that meet or surpass expectations

Best in class for loyalty, recommendations, and customer retention

### 43 Seconds

Average unscheduled downtime for Stratus serviced servers

Saving more than \$3 billion in downtime cost for our customers

### Zero

Recovery time objective: in seconds

Virtually all system issues resolved with no business interruption

### 6+ Years

Average server life span

Superior ROI (Return on Investment) and twice the productive value of conventional servers
